

STANDARD SAFE PRACTICES (for the instructor)

- Doors to the labs will remain locked until the instructor is present in the lab. Students will not be in the labs until that time.
- Rules for careful laboratory practice remain in effect. Examples include labeling all solutions, replacing caps on containers, and wiping up spilled chemicals.
- Copies of all experiments to be performed must be on file in the lab coordinator's office before they are performed. The lab coordinator should be informed of any changes to the planned experiments.
- Each experiment is to be completed with appropriate clean-up and waste disposal before beginning the next experiment.
